

5 CNOR Tips for Surgical Site Prep

1. Dry time = 3 Mins on non-hairy skin
 - a. *(no drapes before dry time is met)*
2. Always follow the SDS and IFU:
 - a. SDS- Safety Data Sheet
 - b. IFU- Instructions for Use
3. Sterilize in circular motion - in to out (clean to dirty)
 - a. *(Prep the most contamination area first)*
 - b. *(Avoid pooling)*
4. Assess skin before & after
 - a. *(document)*
5. Pre Op bath (night before & morning of if possible)
 - a. Should use chlorhexidine sponge
